

# Erich Sabo

Technical Project Manager | San Francisco, CA

## SUMMARY

Experienced Technical Project Manager and Software Engineer with 15 years of expertise in delivering successful cloud migrations, streamlining processes through data-driven analysis, and developing productivity-enhancing tools. Skilled in vendor management, leading teams, and driving technological innovation in complex projects.

## EXPERIENCE

### AV Behavior Support Lead at Cruise

Jan 2019 – 2024

Identified and diagnosed Autonomous Vehicle (AV) Behaviors, developed processes and tools to mitigate AV failures, and created communication strategy to interface with cross-functional teams.

- Performed data-driven analysis of AV behavior to identify and root cause Behavior Trends and Fleet Mapping issues. Produced Bi-Weekly reports for executive teams.
- Managed a team of 30 AV testers. Tracked and analyzed performance metrics to improve operational efficiency, reviewed timesheets, and conducted daily stand-ups to relay rapidly changing testing initiatives
- Developed Identification and Communication Strategy to minimize the impact of Disruptive Events and Road Closures on the deployed fleet. Created repeatable processes for rapid mitigation.
- Developed tools to increase team productivity, including automation of deploying road closure updates to AVs. Reduced time to perform update by 75%.
- Created a Retrospective Process to document, summarize, and communicate high-impact AV failures to cross-functional Engineering Teams, Product Managers, and Operations Teams

### Software Engineer at Self Employed

Jan 2018 – 2019

Created full stack web applications and static websites for different clients across small and medium size businesses. Built 50+ semantically structured full-stack web applications and contributed to open source projects. Applied Agile methodologies for project management.

### Technology Consulting Manager at Accenture

Nov 2007 – 2017

Technology Consulting Manager with a focus on Cloud & Data Center programs. Managed and delivered multiple large-scale, complex, cross-functional cloud readiness and application transformation projects from assessment to execution.

- Lead Data Center and Cloud Migration teams responsible for readiness of 100s of applications and migration of 1000s of servers during tenure
- Managed teams of 10+ Cloud Migration Resources - including Migration Planners and Solutions Architects.
- Designed future state application architecture for on-premise to cloud migrations.
- Developed and managed migration plans and integrated IT project plans, with business, application, program and external vendor teams.
- Defined repeatable methodology, infrastructure architecture, and testing strategies to orchestrate migration of client application portfolios to cloud platforms
